Professional Experience

Python Developer Present

VR Gaming Startup London, United Kingdom

- Developed backend financial systems for user-friendly and seamless RW applications.
- Designed and updated productivity applications, resulting in increased user downloads within hours of release.
- Supervised programming tasks and ensured successful product update deployment, consistently maintaining company websites.
- Designed a marketing lead MySQL database to categorize and filter leads from diverse sources.

Technical Support Specialist

Polyhire (NYSE Listed Recruitment and Employer Branding Company) London, United Kingdom

- Resolved customer inquiries regarding business software, CMS, IP cameras, DVRs, and access control systems.
- Provided technical solutions for SMEs and micro-merchants, supporting a significant portion of Polyhire's card payments.
- Identified a software glitch, preventing customer access to accounts, within the first week of employment.
- Responded to customer inquiries via chat and live support within seconds.

Junior Software Developer

Growthsi (Career Training and Membership SaaS) London, United Kingdom — Barcelona, Spain

- Developed a user interface as a single-page application using React and MobX, improving user productivity.
- Implemented functionality to support disconnected client machines, enabling offline data access.
- Designed a data dictionary generator for developer documentation as spreadsheets and web pages.
- Launched a search engine for consumers to locate ATM locations in states, leveraging knowledge in data research.
